

C-FM4/FM4 SERIES

The Kramer FM4/FM4 cables are high performance cables with 4-pin FireWire connectors at both ends. They are used primarily for data transfer (IEEE 1394) at speeds up to 400Mbps between multimedia devices such as digital cameras, and editing systems.

- Quality Construction - Constructed using two separately double-shielded data cables, in an overall double-shielded outer jacket.
- High Quality Connectors - Molded 4 pin connectors on both ends. The 4 pin connector is popular on cameras and other small devices due to its compact size, but does not support power transmission.
- Varied Selection of Lengths - Available in 3, 6, 10, 15, and 25 foot (0.9 to 7.6 meters) lengths.

CONFIGURATIONS

MODEL	DESCRIPTION	FEET
4 pin - 4 pin		
C-FM4/FM4-3	Fire Wire (4 pin -4 Pin)	3'
C-FM4/FM4-6	Fire Wire (4 pin - 4 Pin)	6'
C-FM4/FM4-10	Fire Wire (4 pin - 4 Pin)	10'
C-FM4/FM4-15	Fire Wire (4 pin - 4 Pin)	15'
C-FM4/FM4-25	Fire Wire (4 pin - 4 Pin)	25'
