

Venture® VideoBAR **SKU: 999-50909-000**

An all-in-one 4K video conferencing solution designed to deliver exceptional audio and video quality with an ultra-high-definition image sensor and advanced tracking technology.

Key Features:

- 5x digital zoom with 110° horizontal field of view
- Simultaneous outputs provide 4K signals from HDMI® and USB 3.0, and full HD signals via IP streaming
- Premium audio with built-in Hi-Fi speaker system and integrated 6-element beamforming microphone array
- Advanced tracking technology options frame the active speaker, the whole group or present a gallery view
- Remote management with a browser-based user interface for configuration, management, and control

4K video quality

Enhance your remote collaboration experience with the all-in-one Venture VideoBAR, providing lifelike audio and video quality for standout video conferencing. Its ultra-high-definition 8.51 Megapixel 1/2.5-type CMOS image sensor delivers striking 4K video signals on par with Vaddio's renowned premium RoboSHOT® cameras.

Wide angle views and 5x zoom

Venture VideoBAR features a 110° wide-angle horizontal field of view that enables everyone to fit into

the frame even in tight spaces while its 5x digital zoom reaches presenters in the back of the room.

#### Room-filling audio

A 6-element beamforming microphone array and high-fidelity speaker system ensure crystal-clear audio with natural voice reproduction. Venture features full duplex dialogue with built-in Digital Signal Processing, including echo cancellation, volume equalization, and noise filtering for natural communication. With an integrated microphone pickup range of up to 20 feet (6 m), the Venture VideoBAR is ideal for small to medium spaces.

#### Audio options for larger spaces

Optional expansion microphones increase flexibility by offering an additional 20 feet of pickup range for various meeting room scenarios. When installed in larger rooms, you can easily connect the Venture TableMIC to the Venture VideoBAR with a single category cable. Daisy-chain up to three microphones for full microphone coverage in even the largest boardrooms. Venture TableMIC microphones also feature a convenient universal mute button and a status light to provide control near participants. Venture TableMICs are only compatible with Venture VideoBAR.

#### Advanced tracking capabilities

The Venture VideoBAR features both manual PTZ and ePTZ control and tracking technology, offering three modes to choose from: Speaker Framing, Participant Framing, and SmartGallery. Utilizing advanced facial and speaker tracking algorithms, the Venture VideoBAR can focus on and frame a single presenter in the space. It leverages the beamforming microphone array to precisely pinpoint the speaker's position without adding distracting video motion. It can also accurately frame a group of coworkers, eliminating wasted space and bringing people front and center. Additionally, the articulating camera lens with dual motors provides smooth pan and tilt adjustments of up to  $\pm 15^\circ$ , enabling the camera to frame the action in the room

without relying on ePTZ cropping abilities.

## Super simple installation

With the attached tilt-adjustable table stand, installing Venture is as simple as taking it out of the box and placing it on the table. The stand features a Kensington® lock port for added security and a rubber base for stability and noise isolation. For more flexibility, Venture includes a mounting bracket that allows you to rotate the table stand backward and securely attach it to the wall.

For an even sleeker setup, the optional Venture VideoBAR Deluxe Mount reduces the wall mounting depth and offers compatibility with Chief or other third-party mounts.

## Connectivity

The Venture VideoBAR is a plug-and-play device that offers simultaneous USB, HDMI and IP streaming outputs. Simply connect to your PC via the USB 3.0 connection to gain access to clear audio and 4K video, allowing you to start meetings within seconds. The HDMI output can be connected to a local display as a confidence monitor to see what the audience will see during video conferences. Additionally, use the Venture VideoBAR as a speakerphone for voice calls or jam out to tunes thanks to a simple Bluetooth® connection.

## Better collaboration for the remote workforce

With its all-in-one design featuring premium video and audio, remote management capabilities, and Vaddio's commitment to support, the Venture VideoBAR is a comprehensive conferencing solution that simplifies communication and fosters collaboration in today's dynamic work environment.
